

Award Winning Biochemist Joins Kraig in Developing Spider Silk Polymers

Tuesday August 12, 6:00 am ET

Kraig Biocraft Laboratories, Inc. Announces Significant Addition to Research Team

LANSING, Mich., Aug. 12, 2008 (PRIME NEWSWIRE) -- Kraig Biocraft Laboratories, Inc. (OTC BB:[KBLB.OB - News](#)) is pleased to announce today that micro-biologist Dr. Fanghai Wang has joined the scientific team to develop new high performance polymers using spider silk gene sequences.

“Our sponsorship of polymer research and development at the University of Notre Dame continues to be a success,” said the Company’s CEO Kim Thompson. “The University of Notre Dame hired Dr. Wang to accelerate the pace of our research and development program. We are very fortunate to be able to bring someone of Dr. Wang’s caliber into the laboratory, and we want to thank the University of Notre Dame for its foresight and diligence in bringing Dr. Wang to the project. More importantly,” Thompson continued, “the addition of Dr. Wang to the team helps fulfill our goal of accelerating the pace of our product development in 2008.”

Dr. Wang is the second major scientist to join Kraig’s research team within the last four months. The Company anticipates that it will be able to announce the hiring of additional high level scientists within the University research laboratory in the coming weeks.

Dr. Wang received his Ph.D. in 1996 from the Chinese Academy of Sciences in Beijing, China. His extensive research background includes work in research laboratories in Japan, China and the Czech Republic. He is the author or coauthor of more than a dozen scientific articles relating biology and biochemistry, and is the recipient of a Chinese Academy of Sciences Award.

Kraig is working to develop and commercialize high performance polymers using spider silk gene sequences. The company hopes to tap into the \$92 billion market for high performance and technical fibers. In 2007 Kraig Biocraft Laboratories signed an intellectual property and collaborative research agreement with the University of Notre Dame. Since that time the Company has been a proud sponsor of scientific research within the university.
